A Wise Provision.

The advantages of life insurance are daily becoming better understood and appreciated, as one after another of our friends departs, leaving behind the testimentary rights of their friends to the protection of the provision for a life policy for the benefit of their families. This manner of securing an inheritance so easy, effective, and at a time when most needed, is certainly of such importance as to command itself to the judgment of all. These thoughts were suggested by reading the end which we have appended below. Mr. Louis Wiroth died the 8th day of February, 1868, and had a policy on his life for \$5,000 in the St. Louis Mutual Life Insurance Company; and now the State agent of the company, Mr. S. J. Smith, has written to him to the effect that the deceased was entitled to receive dividends, amounting to \$3,214.65. The manner in which this reliable home company has met this claim and others among us, will inspire with confidence all who have or may become policy holders in it.

We have associated with us in the conduct of the Louisville Democrat Dr. Massey, a sterling Democrat of the Jefferson school, a man of influence, talent and energy, who will aid us in keeping the Democrat what it is—the best paper west of the mountains.

PROSPECTUS.

The Daily Democrat by Mail—Only Six Dollars a Year, or Sixty Cents a Month, always in Advance—A Paper Every Day, Sundays included, the Year Round.

In this age of excitement, of work, of lightning and of steam, the thirst for news has become imperative, for the news that can be got and rendered portable from every source, and the most rapid means of communication for the papers that will aid us in keeping the news has become the necessity for successful journalism.

The proprietors of the Louisville Daily Democrat have determined, at immense cost, to supply this natural demand, and to inaugurate a paper which will be most useful in the Eastern cities, and which cannot fail to promote the interests of our citizens and the reputation of our city. They propose, with the aid of most accomplished and experienced editorial assistants, to furnish, in an abbreviated and attractive form, all the news of each day that can be culled from the dispatches, from correspondence and exchanges. Although paying high prices for the telegraph as any other paper, they will do so, and will thus transmit in order to save space for items of interest which it fails to supply. Lengthy communications will necessarily be excluded, save in exceptional cases of great public importance. The labor of preparation in the office will be greater than that of any other paper in the West or South; but if thereby the valuable time of the reader is saved and improved, our compensation is sure. Where details of interest, their value will not be undervalue the paper lost in giving them in full.

Thus, it is the intention of the Democrat to furnish to its country readers a newspaper every day in the year for just half of that they have hitherto paid for six papers a week for the same time. In all respects it will not only maintain its well-established reputation, but add to it, and at a reduced price.

The attention of postmasters and all others is invited to an inspection of its merits—to a close and scrutinizing inspection.

All orders promptly and carefully filled, either by the month, quarter or year.

Sixty cents per month; three dollars and fifty cents for six months, or six dollars per annum—ALWAYS IN ADVANCE; and every paper discontinued with the expiration of its subscription.

To Correspondents.

The columns of the Democrat are open to the public, and all correspondence, whether of interest to the masses will be promptly published. All matters pertaining to the advancement of the manufactures and trade of Louisville, and of the working and producing classes, will receive prompt attention. Names of correspondents must invariably accompany their communications.

To Newsmen.

The Daily Democrat can be obtained at the office, by application in person or by letter. All orders promptly filled, and at rates offering most substantial inducements to newsmen.

Abyssinia—Its History, People, and the Cause of the British Invasion.

On a blue Red sea, in which none of Pharaoh's hosts appear, and south of a green Nubia, between the 5th and 20th degrees of latitude N., is about one inch and a half square of pink Abyssinia, on the map, about which country England is kicking up a row. The country is tropical, and on a parallel with the Caribbean sea and the West India islands.

The name Habesh, corrupted by the Europeans into Abyssinia, signifies mixed, and the unrivaled variety of soil and climate, and the sudden transitions

in its physical features and productions, its people of many races, make the term appropriate. It is, however, rejected by the natives, who are proud of a purity of race, and claim an unbroken line of descent in their monarchs from Solomon and the Queen of Sheba, Menelik, 986 B. C., inherited the kingdom from the Queen of Sheba, was educated and crowned in Jerusalem, and brought away a colony, a copy of the laws, and a son of Zadok to interpret them. Judaism was long the religion of the country, and it is now held in purity by a colony of Jews or Falashes, who, until the seventeenth century, kept themselves distinct under their own government. Strange to say, history favors the proud claim of the Abyssinians, and it is not impossible that the suitor rejected by the barbarian Queen Victoria is a lineal descendant of the wise Solomon, builder of the temple, and whose wisdom is a part of the religion of the Christian world. If high descent makes merit, the coarse Guelph blood of German robbers might well have been purloined with that of the wisest of the wise and the fairest, richest and wealthiest queen of the east.

Herodotus speaks of a king of Ethiopia who held Nubia, and the ruins of Axum bear traces of Greek civilization dating at a period earlier than the Ptolemies. Axum, a great city, flourished till the time of the crusades. The empire, however, changed and sank, A. D. 300, a Greek philosopher set out for India to trade, and the vessel was wrecked. Two youths escaped, and Frementius, one of them first a slave, then tutor to the future king, taught the Christian faith, was ordained by Athanasius, then at Alexandria in the patriarchal chair, as bishop, patriarch, or abuna of Abyssinia. The capacity of this singular race to receive instruction, and their avidity in it, is exemplified in this and repeatedly afterwards. A colony of Jews, settled after the destruction of the Holy City, refused to accept Christianity. It is gratified at the bad character of its candidates, as depravity makes popularity.

DIAPHRANOUS.—France smoked 42,000 five cent cigars last year. No wonder Louis finds himself rather "under a cloud."

DR. STANTON and Thomas seem to have had a high old spire—in fact, the whole war. It seems to have kept up the spire du corps.

DR. LANGSTON, the Ohio colored orator, declined a seat on the floor of the Senate. There is bigger enough in that body already.

DR. MILLER STEWART is gratified at the bad character of its candidates, as depravity makes popularity.

DR. RESURRECTION for the filamentous bacteria, which are the cause of many diseases, is a pure and inviolated vegetable stimulant, with the finest selection of onions, anti-bilious, anti-acidic, and anti-reparative herbs, plants, roots, and berries that have ever been heretofore in a medicine.

Nature's safe ally, and beauty's regenerator. Manufactured by J. CRISTADOURO, 6 Madison Avenue, New York, as per Dr. Langston's prescription.

DR. WALTERS.—The Missouri Republican calls the impeachment a "divorce case." No doubt it will be *ea mensa et thoro*.

DR. THURLOW WEED says Grant's name is a tower of strength. It tumbled in Connecticut like the Tower of Babel.

DR. FORNEY talks of assassination. If he doesn't make a double donkey nation of it, his paper brays in a martyr.

DR. BROWNLOW's penitentiary is so crowded, it excuses somewhat his party remaining on the outside.

DR. WOMAN, says Susan B Anthony, is advancing rapidly. Certainly she outstrips her mothers.

DR. AN EXCHANGE says Butler will go into Grant's Cabinet. No doubt, if it is not kept locked.

DR. WHEN Grant is chosen to the Presidency, he will probably retain a vice of his own choosing.

DR. TO DYE in the last ditch was not near so wise as to get out of "them diggins."

DR. THE AUSTRALIAN ant-eater makes a battlefield of his dinner—Ant-eatin'.

SLAVES DEMAND THEIR FREEDOM—SUPPOSED ARRIVAL OF ST. LÉGER GRENADE.

NEW YORK, April 11.—The slaves state that those on the plantations they are working in a copper mine which belongs to England, and that they are to be freed when they are sent to the United States.

The case is in the courts.

Two men in an open boat were picked up, and it is believed that they are deserters from some of the prisons in Florida. It will be remembered in this connection that St. Louis was supplied with some soldiers from the Dry Tortugas.

Colored people are being arrested in Cuba for practising witchcraft.

MEXICO.

By Telegraph to the Democrat.]

FEARS OF AN AMERICAN INVASION—MORE ARRESTS.

HAVANA, April 11.—A Spanish steamer has arrived from Vera Cruz the 10th. A railway has been projected from Presidio del Norte to the capital of the invasion of Somora, Lower California, and Shiloh by Americans. The new Governor of Mexico has been elected Governor of Michoacan in place of Crepidi, Sonnada. The new Governor of Coahuila has been elected about the end of April. The ministry in Yucatan is quieted.

THE TRADES.

Condition of the Various Branches of Labor and Industry in the City.

NO. V.

Having gone now through most of the trades and occupations, and having had a few days more before we will get our articles finished, we shall, after we have concluded them, continue to publish all items of labor and trade that would interest the working man or mechanic. Any of the unions who will admit of our publishing their names may do so, and we will place their names before the mechanics of the city. Below we give a review of a few of the trades:

STONE CUTTERS.

No more hard working class of men can be found in the city than the stone cutters. They are a hardy, strong, and being a most excellent and orderly body of workmen. They have a union established among them, and are doing well.

The organization numbers about 150 members in good standing. The officers of the union are: President, J. H. Holmes; Vice-President, Paul Holmes; Treasurer, Louis Napeon. The wages stone cutters receive are from \$1 to \$2 per day, and they are required to do 10 hours work. They are required to do the trade in this market lay down.

Eastern exchange has been quite during the week, and the rating rates have been put into effect.

Transactions in gold are reported of limited magnitude. The New York market opened at \$1,200 per oz., and closed at \$1,190 per oz. New issues, 100 oz., 75¢, second and third series, 100 oz.

In regard to the future of the market, the New York market has been very dull through the winter, but we are glad to find that there is a good deal of hope with prospects of this being even a fair better season than the last. There is a sufficiency of stone cutters in the city, and we mentioned them and their wages above.

RAILROAD AGENTS.

Nearly all the roads in the country have agents in our city. Some of them work for one or more roads, and their wages are from \$100 to \$150 per month, and require quite a portion of this in obtaining trade for their roads. There are a sufficient number of them to keep the market fairly enough conversant with the business. There are about ten agents in the city.

RAILROAD OFFICES.

Outside of the post office depot offices there are three railroad offices in the city—one at the corner of Third and Main street, one at the corner of Second and Main street, and one at the corner of First and Main street. These three offices sell about \$50,000 worth of tickets per month to parties going in every direction. The day ticket is \$1.00, and the ex-interior ticket is considerably cheaper than they were five weeks ago, furnishing a strong argument in favor of a further material rise.

The World of the same date remarks: "The carriage makers were quite numerous only a short time back, but the pressure of the times compelled them to leave the city for the country, and the number of carriages sufficient to live upon until trade prospeets became better. From nearly one hundred makers in the city, only twenty remain, and makers has been reduced to less than forty. The business is now beginning to brighten up very well, and the demand is still greater, but little, owing to the light demand in the South. The wages paid are as follows, to the best of my knowledge: Carriage makers, workers work by piece work, and make about \$100 per week; good wood workers, however, make \$120 per week; cabinet makers, \$120 per week; gold and silver workers, \$120 per week; trimmers, \$120 per week; turners, \$120 per week; and some of them, such as those who turn out small articles, \$100 per week. They have a union, which at present is not as well kept up as its members would like, but the union is doing well, and credit good in the South this year, a demand for buggies and carriages will be made, and doubtless will be well supplied."

PAINTERS.

The painters have no union, and the business has so many different branches that the wages vary greatly, and the size of the job, and who are the most important branch receives from \$10 to \$30 per day. Other painters, such as sign writers, etc., receive \$10 to \$15 per day, frequently receiving higher wages. The trade has been very dull since last summer, but is now in quite a拾起ing condition. There are no painters in the city to meet all requirements, and building on lively this spring it will give plenty of work.

CLEERS, BOOKKEEPERS, &c.

The applications for situations as clerks are legion, and vacancies occur but rarely, a clerk who is well educated and has a good memory as possible. There are so many young men and boys just from college and school, whose parents are well off, that they are willing to work for nothing, in order to get a situation, and in order to give them a knowledge of business, and are not particular what wages they receive. They are willing to work for \$10 to \$15 per week, and shilling clerks average from \$3 to \$5 per week.

There are many clerks in the city to meet all requirements at present, but in building on lively this spring it will give plenty of work.

STATIONERS.

The men who own our newspapers and books are in a bad way in the city. There are probably from 150 to 160 of them. The National Typographical Union has a large number of them, and John J. Roberts, president; Wm. F. Fritz, vice-president; Jas. A. Astacio, recording secretary; John T. Anderson, corresponding secretary; George Beatty, treasurer; R. W. Johnson, business manager; and Jas. C. Smith, nearly 30 active members in good standing. Job printers are paid at the rate of \$20 per week, and bookbinders \$15 to \$20 per week. The price per thousand is regulated by the union, and is at present fifty cents. This is a fair price, and brings him nine thousand per month, which brings him \$4 or \$5 per day. The work in newspaper offices, bookbinders, etc., is very good, and rarely stand to work more than five or six nights a week, the city papers all at \$10 per month.

This makes their average wages from about twenty-five to thirty dollars per week. There are also a number of small printing offices, and these are paid at the rate of \$10 to \$12 per week.
